

R400 CENTRE CHANNEL SPEAKER

Crisp dialogue and dynamic sound right in your living room

The Polk Reserve R400 center channel speaker features dual 6.5" Turbine cones and a 1" Pinnacle tweeter. This flagship transducer array delivers the clearest, most intelligible vocals for your favourite movies, shows, games and more. The newly patented X-Port eliminates cabinet resonance for distraction-free enjoyment.

SPECIFICATIONS

Transducer	1" Ring Radiator Two 6 1/2" Turbine Cone
Minimum Impedance	4.1Ω
Sensitivity	89dB
Frequency Response	48Hz - 39kHz
Dimensions and Weight	(W)615mm x (H)196.6mm x (D)350mm 14.9kg

Consumer Benefits

Crystal Clear Vocals For Your Home Theatre

The centre channel is the most important speaker in any home theatre setup. The Reserve R400 uses Polk's latest flagship transducer array to deliver clear, crisp, intelligible dialogue no matter where you sit.

6.5" Turbine Cone

Polk developed the Turbine cone specifically for our flagship products to ensure the natural reproduction of the mid-range, to which human ears are particularly sensitive. The Turbine cone combines Polk's proprietary foam core and molded Turbine geometry which dramatically increases stiffness and damping, without adding mass. You will hear every detail and experience a smooth, detailed mid-range and effortless bass.

Cabinets Built for Better Performance

Polk believes cabinets should be beautiful and add nothing to the playback. Polk Reserve cabinets, braces, and internal enclosures are carefully engineered to minimize unwanted internal standing waves and eliminate unwanted resonances. The result is a cabinet that rigidly holds the transducer array while it faithfully reproduces recordings.

Polk's Newly Patented X Port (ETF Port)

Polk's newly patented X-Port incorporates an Eigentone Filter (ETF) offering distortion-free, effortless bass. Consisting of a set of closed-pipe absorbers that are specifically tuned to catch and eliminate traditional speaker distortions. X-Port ensures that the upper bass and mid-range are free of port and cabinet resonances for smooth, detailed audio.

High Definition Pinnacle Ring Radiator Tweeter

Over 40 years of tweeter innovation, design and prototyping has led to the development of the new 1" high definition Pinnacle ring radiator tweeter. Developed by Polk Audio, it delivers ultra-clear, crisp highs without unwanted colouration or distortions. The Pinnacle tweeter features a finely tuned waveguide that dramatically improves the dispersion of high frequency energy ensuring a broad "sweet spot" while the critically damped rear-chamber helps defeat any unwanted resonances.

Features

- **Home Theatre Essential:** The centre channel speaker is the most important speaker in your home theatre system, delivering movie and TV dialogue with exceptional clarity
- **Pinnacle Tweeter:** The new ring radiator tweeter design dramatically improves dispersion while delivering clear, crisp and natural highs
- **Turbine Cone:** Delivers smooth and incredibly detailed mid-range imaging
- **Polk Patented X-Port:** closed-pipe absorbers that are specifically tuned to catch and eliminate traditional speaker distortions
- **Anti-diffraction Magnetic Grilles:** Acoustically inert grilles offer a clean aesthetic without sacrificing sound
- **Premium Finish:** Available in Midnight Black
