The Beauty and Elegance of High Quality Materials

The center unit is made from aluminium with outstanding rigidity.
The top cover is a thick aluminium panel with a hairline finish, giving it an elegant appearance.
The subwoofer has a simple design that blends nicely with any interior.

Sleek, Sophisticated Appearance

With a height of only 52mm, the slim-design center unit can be placed in front of a TV without blocking the picture. The high-class minimalist design and aluminium chassis will definitely add a sophisticated appearance to your interior decor.

Enjoy All Your Music Sources

MusicCast lets you network audio equipment with a wide variety of functions and features.

Share music from any source, not only from network music but also from equipment connected to external inputs including HDMI® and analogue, and enjoy the increased pleasure and satisfaction you get from upgrading your audio equipment.

Overwhelming Realism with 16 speakers

The front unit of the YSP-2700 is equipped with 16 2.8cm high sound quality array speakers which create beams of sound. It optimizes the layout of its array speakers, boosting the reflection properties of the beams to maximize sound quality.

Amazing Real 7.1ch Surround Sound

YSP-2700 creates beams of sound by combining the sound projector's many speaker groups via digital signal processing and reflects them off the walls of the room, actually reproducing a realistic 7.1channel surround effect with the sound coming from the left and right and even from the rear. The listening area is expanded so you enjoy an extremely powerful, natural sense of presence unobtainable with virtual surround methods.

Professional-Grade Acoustic Calibration

Yamaha's IntelliBeam™ system uses a high sensitivity microphone and sophisticated EQ processing to precisely measure the room acoustics and automatically adjust various speaker parameters, providing the best balanced sound quality. This sound engineering enables the expression of the intended sound design in your home.

IntelliBeam

IntelliBeam™ Automatically Sets the Optimum Sound Field

Yamaha's IntelliBeam™ room acoustics calibration system automatically set the perfect listening environment.

All the user has to do is push a few buttons while following the on-screen instructions. The system measures the room's acoustic properties such as size, shape and wall material, then adjusts the beam angles, focal lengths, volume and other audio parameters.

The result is precise sound optimization matched to the listening position, for any size and shape room.

Rich and Crisp Bass

Yamaha designed the woofer to delivering deep, powerful bass from movies, but also put a lot of emphasis on its music reproduction ability. The low frequency sounds of bass and drums are the foundation of music's rhythm and groove. The YSP and YAS models use a front-firing design that provides high speed, superior bass response, ensuring that they can accurately reproduce musical rhythm and groove.

Wireless Subwoofer for Flexible Placement

The subwoofer eliminates the need to connect cables, so setup and placement are faster and easier.
This is a convenient subwoofer that delivers powerful, high quality bass sound.

Centre unit

For highest sound quality, a wired connection can be used.

Subwoofer

10 CINEMA DSP Programmes

Yamaha's ultra-sophisticated CINEMA DSP technology creates thrillingly realistic soundscapes in any room. You can select 10 different programmes, including three Movie, three Music and four Entertainment programmes.

Movie		Music			Entertainment			
Adventure	Spectacle	Music Video	Concert	Jazz Club	Sports	Talk Show	Drama	Game

compressed music ENHANCER

The Compressed Music Enhancer restores frequency response lost during digital compression, so your music sounds the way it should.

It is optimised for any compressed content, for vivid, lively sound quality during wireless playback. The function can be switched on and off via the remote control, according to the input source.

By using signal processing to add the high frequency range that was reduced by a compression format, more natural sound expansion is achieved, along with improved stereophonic image and clearer low range.

HD Audio Decoding

The YSP-2700 decodes HD Audio signals to ensure that you hear the best possible sound from Blu-ray Disc players, as well as from other digital sources.

HDMI[®] Terminals with 4K Ultra HD Support

The YSP-2700 has three HDMI[®] input terminals and one HDMI output terminal, and supports 4K/60p video signal pass-through. It's also compatible with HDCP2.2 digital copy protection. This gives it extensive expandability, so you'll be able to use it far into the future.

MusicCast DOLBY AUDIO

Advanced features

- Digital sound projector technology reproduces overwhelmingly real surround sound
- MusicCast for audio enjoyment in every room
- *Bluetooth*® for wireless music streaming
- *AirPlay*® allows music streaming from Mac, PC, iPod®, iPhone®, iPad®
- *Bluetooth*® output
- HDMI (3 in / 1 out) input with 4K60p Pass through and HDCP2.2

High Sound Quality

- 7.1ch surround sound with sixteen array speakers
- HD Audio Format Decoding (Dolby Digital True HD, DTS-HD®)
- CINEMA DSP (10 Programmes)
- IntelliBeam™ automatically sets the optimum sound field for each room
- Wireless cubic subwoofer for rich and crisp bass
- Compressed Music Enhancer
- Clear Voice makes dialogue and narrations easy to listen to

Ease of use

- Control app for easy operations (MusicCast CONTROLLER)
- Easy-to-see On Screen Menu viewable in ten languages

[Main Specifications]

Maximum Output Power

107 W total power: 2 W x 16 beam drivers + 75 W subwoofer

System Frequency Response

TBD

[Centre Unit]

Drivers

2.8 cm x 16 beam drivers

Terminals

(Input) HDMI:3, Optical Digital:1, Coaxial Digital:1, Analogue Audio:1

(Output) HDMI:1, Subwoofer:1, System Connector:1

Network Functions

LAN (DLNA), Wi-Fi, Bluetooth Audio codec: SBC, AAC

Standby Power Consumption

TBD (HDMI Control OFF, Network Standby OFF),
TBD (Network standby ON, Wi-Fi connection)

Dimensions (W x H x D)

944 x 117 x 153 mm (with antenna)
944 x 52 x 143 mm (without antenna)
