

# VM95 Series Stylus Upgrade

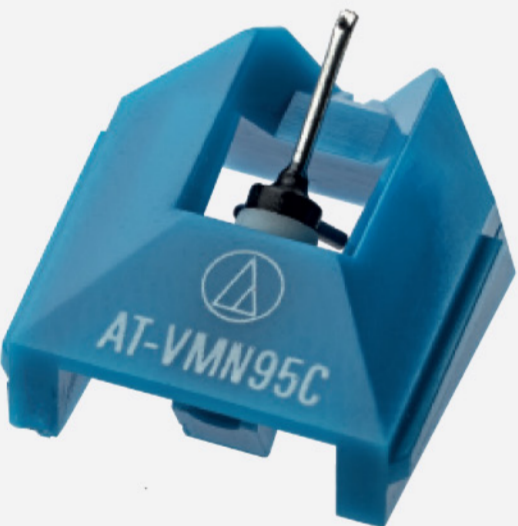

Diamond  
(bonded to metal)

— Metal

## Bonded Stylus Models

In a bonded (or jointed) stylus, a diamond tip is glued on a metal shank that is itself glued into the hole of the cantilever. This type of stylus is generally less expensive to produce, but provides an excellent option for the casual listener.

### AT-VMN95C

Conical replacement stylus for AT-VM95C

Perfect for casual listener searching for a reliable cost-effective cartridge

### AT-VMN95E

Elliptical replacement stylus for AT-VM95E

Next generation of the legendary 95E, considered one of the finest entry-level phono cartridges ever produced

### AT-VM95SP

3mil Conical replacement SP stylus for AT-VM95SP

Designed for use with 78 rpm/shellac or short play (SP) records

— Whole diamond

## Nude Stylus Models

Nude styli, shaped from whole diamonds, are more costly than bonded styli. But because of their lower mass, nude styli track more accurately. Also, since our nude styli are grain-oriented, with their longest-wearing faces touching the record surface, they last longer.

### AT-VMN95EN

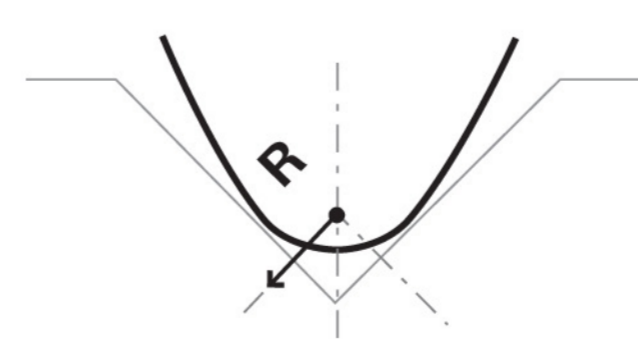

Elliptical nude replacement stylus for AT-VM95EN

Ideal step-up model. The nude elliptical tip is lighter and follows the groove of your records with more precision

### AT-VMN95ML

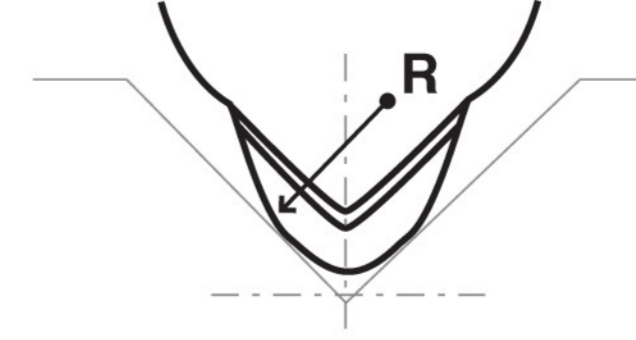

Microlinear replacement stylus for AT-VM95ML

Microlinear (ridge shape) allows for more precise contact with record grooves leading to higher fidelity and less inner groove distortion

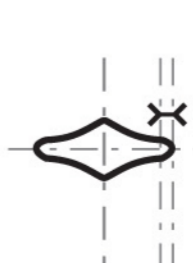

Microlinear
