A UNIQUE TWEETER PRINCIPLE - AMT

The fascia plates are machined from a single piece of Aerospace Grade Aluminum. Precision machined, glass blasted, brushed and then anodized in a beautiful Tungsten Titanium Grey color. It features a rose gold plated dispersion mesh, which works as an S-Stop filter and Improves driver Integration.

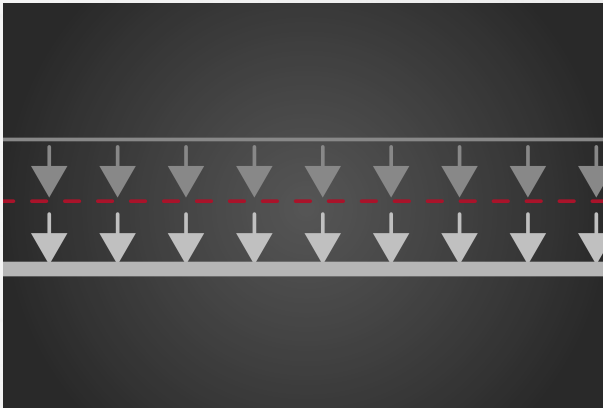

SWEET AND DETAILED SOUND

Inspired by the POP filters used in the professional recording industry, we have engineered a dispersion mesh in front of the QR AMT tweeters, which also works as an S-STOP filter, controlling sibilants. Music never sounded more detailed, yet sweet, from a loudspeaker in this class. Just Listen.

POWERFUL AND PRECISE

This new Audiovector drive unit has the ability to work like a perfect piston over several octaves of the frequency band, allowing us to use very amplifier friendly filters. This means music sounds warm, precise and detailed, yet dynamic and musical even with low power amplifiers.

ADVANCED MEMBRANE TECHNOLOGY

Based on our experience with stiff, light and sound dead membranes in the R-series speakers, we have developed a new sandwich membrane, which combines the strength of Aero Space Grade Aluminum with the excellent inner damping properties of softer materials. The result is a 3-layer sandwich membrane with no sound of its own and very low distortion. Perfect for accurate music reproduction.

AUDIOVECTOR QR SERIES

The design goal of the QR family of high quality speakers has been to offer today's most advanced technology in a perfectly finished compact package with the best sound quality.

SOUND QUALITY AND EASE OF USE

The sound is big and bold, pleasant and detailed – excellent for all types of music. The QR 1 bookshelf speaker fits nicely into or on the most popular shelf systems. The QR 3 looks compact and will fit into any home environment. The perfectly detailed and sweet treble promises endless hours of musical joy, and the powerful and dynamic bass will allow any recording to sound its very best.

QR-SERIES

QR Centre

COMPACT HOME CINEMA

The QR C centre speaker matches its siblings perfectly, and with the addition of this and with the powerful QR Sub and the QR Wall (which work either in direct or diffuse mode), we are proud to have a very competent full home cinema system.

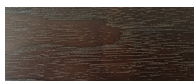

SOUND QUALITY

The sound is big and bold, dynamic, pleasant and detailed – excellent for all types of music. The QR 5 is now the biggest speaker in the QR series and by far the best performer. The perfectly detailed and sweet treble from new and bigger AMT tweeter promises endless hours of musical joy without fatiguing your ears. The powerful and dynamic bass will allow any recording to sound life like and at its very best.

FAMILY MATCH

The QR 5 speaker matches its smaller siblings perfectly. With the addition of the powerful QR Sub, the detailed QR Center and the easy placed QR Wall, we are proud to be able to deliver a very potent and powerful home cinema system.
