

VM95 Series Cartridges

— Metal

Bonded Stylus Models

In a bonded (or jointed) stylus, a diamond tip is glued on a metal shank that is itself glued into the hole of the cantilever. This type of stylus is generally less expensive to produce, but provides an excellent option for the casual listener.

Diamond
(bonded to metal)

AT-VM95C

Dual Moving Magnet Cartridge with Conical Bonded Stylus

Perfect for casual listener searching for a reliable cost-effective cartridge

AT-VM95E

Dual Moving Magnet Cartridge with Elliptical Bonded Stylus

Next generation of the legendary 95E, considered one of the finest entry-level phono cartridges ever produced

AT-VM95SP

Dual Moving Magnet Cartridge with Conical Bonded Stylus

Designed for use with 78 rpm/shellac or short play (SP) records

— Whole diamond

Nude Stylus Models

Nude styli, shaped from whole diamonds, are more costly than bonded styli. But because of their lower mass, nude styli track more accurately. Also, since our nude styli are grain-oriented, with their longest-wearing faces touching the record surface, they last longer.

AT-VM95EN

Dual Moving Magnet Cartridge with Elliptical Nude Stylus

Ideal step-up model. The nude elliptical tip is lighter and follows the groove of your records with more precision

AT-VM95ML

Dual Moving Magnet Cartridge with Microlinear Nude Stylus

Microlinear (ridge shape) allows for more precise contact with record grooves leading to higher fidelity and less inner groove distortion

AT-VM95SH

Dual Moving Magnet Cartridge with Shibata Nude Stylus

Premier VM95 cartridge. Shibata shape has two longer, narrower radii, allowing more surface contact resulting in an extended frequency response and a highly detailed listening experience
